

Planning Guide - Washers & dryers

Measurements that are off even slightly can cost you more money and create hassle. We recommend measuring twice before making a purchase.

warnersstellian.com

An appliance returned because it will not fit or it's the incorrect fuel type will incur a delivery fee and possibly a restocking fee. For questions or concerns about dimensions, please contact your sales associate.

Need help measuring? Our in-home premeasuring service is only \$129.99

What type of fuel is your dryer?

Please verify if your dryer is gas or electric.

A gas dryer has a normal 110V/120V outlet. An electric dryer has a larger outlet with three or four prongs (holes).

- Gas Electric - 3 wire Electric - 4 wire

If your dryer is electric, is it hard wired?

- Yes No

Would you like to include a new cord on your order?

Most manufacturers don't provide cords with electric dryers. You can purchase a new 220V cord from Warners' Stellian.

- Yes No

Gas shutoff out of code

Gas shutoff current code

A new gas shutoff the valve may need to be replaced if it is not up to code. An approved shutoff valve can be replaced by our in-house plumbing department at extra charge. The installation technician will notify you if it needs replacing.

Double check. Don't double pay.

Use this checklist as a guide to measuring the area.

Measure the height of the space from the floor to the cabinet above if applicable. Measure both the left and right corners of the opening. This measurement is critical especially if you desire optional pedestals for front-load machines.

Left corner _____ inches Right corner _____ inches

Measure the width of the space from any obstruction on the left and right side of the dryer.

Top width _____ inches Bottom width _____ inches

Measure the depth of the area where your laundry will reside.

NOTE: your laundry likely won't reach the back wall due to existing plumbing & venting.

Right side _____ inches Left side _____ inches

Measure the depth of the current laundry from the back wall to the front of the dryer. This measurement will include the open space needed for hoses and venting.

Washer depth _____ inches Dryer depth _____ inches

More Details

Use this section to help figure out placement.

When facing the machines, which side is your washer?

Most common is for the washer to be on your left. Manufacturers produce the machines for this orientation. If your machines are the opposite, the doors will open inconveniently. It is possible to reverse the dryer door of most models and only a few washers.

Left Right

If changing from front load to top load, can the washer be on the left side?

Yes No

Is your laundry room on an upper floor?

Upper floors can affect balancing and sound transmission.

Yes No

Is your laundry area enclosed in a closet-like area?

The doors may restrict the available depth for your new dryer.

Yes No

Dryers

If you have a gas dryer, do you have a gas-line shutoff?

Yes No

Is your vent tube made of metal? A flexible vent tube carries the hot exhaust from the dryer to outside of the home. For safety and liability purposes, Warners' Stellan insists the vent be made of some type of metal.

Yes No

Does your dryer vent from the side, bottom or back?

Some homes require that the vent tube be routed from the side or bottom of the dryer. This requires additional procedures that a sales associate can explain and set up.

Side Bottom Back

How far is the current dryer vent opening to the main duct vent.

Depending on the distance, extended venting may be needed.

_____ inches  Please take a photo of the venting path from the dryer vent to the main duct vent.

Would you like to have us reconnect your gas line?

Our delivery team is qualified to safely connect to proper existing gas line for an additional labor fee.

Yes No

Washers

Per Minnesota state code, hammer arrestors are required for washer installation. See your sales associate for full details and cost.

Would you like to purchase new hoses? Most washing machines do not come with hoses. Steam dryers also do not include hoses. Warners' Stellan can sell you new hoses. Safer braided hoses are also available. Warners' Stellan cannot attach used hoses.

Yes No

How far is your washer from the water supply line?

Depending on the distance, extended hoses may be needed.

_____ inches

How far is your washer from the drain?

Depending on the distance, a drain extension may be needed.

_____ inches

Arrival of your new washer or dryer

Our delivery teams will ensure your experience was pleasant when your appliances arrive.

- Our delivery teams are insured and qualified.
- If requested, our drivers can call you 30 minutes ahead of arrival.
- Both the washer and dryer will be leveled properly.
- Your new washer will be connected and tested if you purchased new hoses. If the washer is cold because of weather, we will not be able to test it.
- Your new electric dryer will be connected and tested if you purchased a new cord.
- Your new gas dryer will be connected and tested if our optional gas reconnect service is purchased.
